Bipolar Tonsillectomy with To-BiTE™ non-stick bipolar clamp

Bipolare Tonsillektomie mit der To-BiTE™ non-stick bipolaren Zange

To-BiTE™

FOUR FUNCTIONS

„Four functions in one instrument make tonsillectomies safer, faster, easier.“

P. Tolsdorff, MD, Bad Honnef (Germany)

1. **Coag**
   Koagulieren
2. **Dissect**
   Spreizen
3. **Aspirate**
   Saugen
4. **Grasp**
   Greifen

Made in Germany.

Tonsillectomies can be performed very quickly with little, but precise and effective bipolar coagulation while most of the dissection is “cold” or “blunt”.
The glossopharyngeal nerve can be identified and spared.[1]
